

# Tips for teaching times tables at home

- Hang times tables up where your child can see them (the kitchen, their bedroom, the bathroom)
- Play games which involve using timetables (here are some links with ideas and games, you can also get apps for tablets <https://www.theschoolrun.com/top-times-tables-games> <https://www.topmarks.co.uk/maths-games/7-11-years/times-tables> <https://www.timestables.co.uk/games/> )
- Show children videos on the times tables (<https://www.bbc.co.uk/teach/super movers/times-table-collection/z4vv6v4> [https://www.youtube.com/channel/UC\\_zy534iRaPxlFdniQZr8Kg](https://www.youtube.com/channel/UC_zy534iRaPxlFdniQZr8Kg) )
- Teach them some tricks for remembering their times tables (some ideas can be found here <https://www.mathsisfun.com/multiplication-tips-tricks.html> )
- Draw a Waldorf flower (One for the creative children. Children start this activity by drawing the centre of the flower, in which they write a number between 2 and 12. They then draw 12 petals around the centre, with each petal containing the numbers 1 through 12. The last step is to draw another set of 12 petals which contain the centre number multiplied by each petal in the inner circle.)
- Remember to reward your child for rehearsing and succeeding in their times tables
